OUR PERSONAL GUARANTEE TO YOU

We personally guarantee to you that the seeds in every package you receive from us are as fine in quality and as full of life and vigor as any that can be grown.

You get the same high quality seed—tested for purity and vitality—as we sell the man whose living depends upon the quality of the flower or vegetable he grows—the florist and the market gardener.

For your convenience we have left out of this book such varieties as are grown entirely for commercial purposes. Here you will find pictured and described only those vegetables and flowers most satisfactory for the home garden.

You will be interested in reading some of the letters we receive from customers. Here is the real proof of quality, the satisfaction our seeds give in the garden.

“Your seeds gave eminent satisfaction. The Marigolds, Zinnias and Asters were the talk of the place. I took six firsts and a special for the highest aggregate of points in the flower division.”

Rev. J. H. Hobbins, Mission City, B. C.,
Canada.

“The Zinnia seeds I bought from you last year produced the finest flowers I have ever had.”

Mrs. W. H. Young, Columbus, Ga.

“I had a row of the most magnificent Sweet Peas I have ever seen, grown from your Early Orchid-flowering Mixture of Colors.”

Mrs. J. E. Keyser, Burlington, W. Va.

“Your seeds do just as you say they will. My Zinnias, Snapdragons and Asters were wonderful.”

Mrs. S. E. Milham, Waterport, N. Y.

“My Zinnias and Asters were beautiful. I had the largest Asters I have ever seen. I think every seed came up.”

Mrs. M. M. Sykes, Pleasantville, N. J.

“I took a neighbor's advice and sent to you last year for my vegetable seeds. They are the best I have ever used in 20 years of gardening.”

R. J. Pope, Erie, Pa.

“I used your seeds last year and had wonderful flowers, so I feel I must have them again.”

Mrs. W. H. Bodestob, Bismark, N. D.

“I had the most beautiful Snapdragons from your seeds that I ever saw. Everyone who came into our yard admired them.”

Mrs. Tom Yule, Fort Collins, Colo.

Grow Pencil Pod Beans for Quality

A Coreless Carrot

This Carrot, called Nantes Coreless, is one of the finest kinds that you can grow in your garden. It is of the very highest quality, sweet, tender and very delicately flavored. People who never liked carrots before are delighted with its tenderness and its absolute freedom from any hard, dry core. Its cylinder-like roots are smooth, half-long, blunt ended and of splendid bright orange-red color. Nantes Coreless matures early and is very productive. To cream carrots, wash, scrape and cut into small cubes; put on to boil with boiling water enough to cover; boil until tender, without a cover. Serve with white sauce. Seed package 10c, oz. 20c, ¼ lb. 50c, lb. \$1.50.

The Coreless Carrot

Our Deltus Cucumber

If you raise your own Cucumbers in your garden we wish you would try, this year, our New Variety we call "Deltus." We believe you will find it better than any you have ever grown. It's very long, 9 to 10 inches, uniform in diameter its entire length, has blunt ends and a very dark green skin. The flesh is solid, crisp, sweet and tender, with but very few seeds. "Deltus" originated right here in Irondequoit and is adding daily to its fame as the best forcing or out-door Cucumber that can be grown. Package 10c, enough for 15 hills, oz. 40c, ¼ lb. \$1.00.

Laxtonian Peas

You will find this low growing, large podded pea a mighty fine variety to grow in your garden. It is an early kind, being ready for the table in 81 days, and the dark green pods are filled from end to end with tender and deliciously flavored peas. Many of our friends who have tried Laxtonian say that it is the best pea they have ever grown. We know it will please you. Pkg. 10c, ½ lb. 20c, lb. 35c, 2 lbs. 60c, 10 lbs. \$2.50.

For High Quality Grow These Pencil Pod Wax Bush Beans

We do not know of a more tender, absolutely stringless Wax Bean with such a splendid flavor. Rarely, if ever, can you buy beans like these at the vegetable store. The plants are strong growing, very productive and hold the beans up from the ground. Grow these if you want quality. Pkg. 10c, ½ lb. 25c, lb. 40c.

Here Is a New Cabbage That Is Just the Right Size for Your Garden

Six Weeks is the Cabbage you have been looking for to grow in your garden. The small heads, five and six inches in diameter, are very solid, mature extremely early, are of splendid quality and best of all can be set as close as 8 inches apart, which saves a lot of room in the garden. We recommend this New Cabbage to every home gardener, for it fills a long felt want in the list of good garden vegetables. Plant a row of Six Weeks Cabbage this season. Its splendid qualities will please you. Pkg. 15c, ½ oz. 60c, oz. \$1.00.

A Remarkably Tender Lettuce That Is Very Easy To Grow

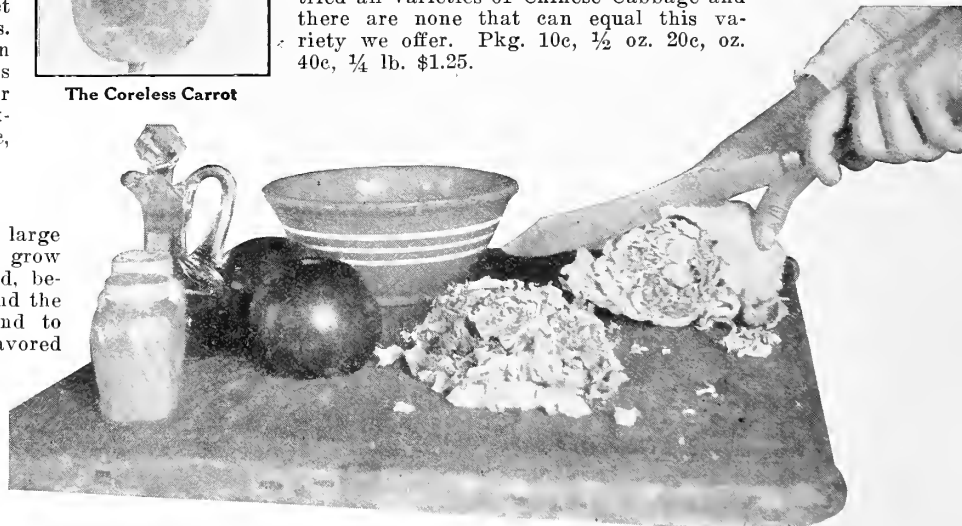

"I want some more of that Lettuce with the brown edge. Grew it last season and it was great." We hear this many times every day in our seed store during the spring. Prizehead is the Lettuce they ask for and it is one of the finest looseleaf kinds for your garden, tender, crisp and sweet. Pkg. 10c, oz. 20c.

Golden Bantam Sweet Corn Has a Flavor All Its Own

Richer and sweeter than any other kind. There have been many kinds offered as equal to Golden Bantam in quality but we have as yet to find one. It is the ideal Sweet Corn for the home garden. It is small growing, 5 ft. high, and can be planted closer than others. It is early, maturing in 10 weeks, and if successive sowings are made, will supply the table all season. The ear, 6 in. long, is just the right size for eating and the quality, well there is nothing that even approaches it. Before you forget it, order some now. Pkg. 10c, ½ lb. 25c, lb. 40c, 2 lbs. 70c.

Chinese Cabbage

Cut into quarters and boiled with a meat or alone, its mild, rich flavor and tenderness put it far ahead of Cabbage. Sliced thinly and served cold with a cream dressing, it makes a most appetizing cold slaw. Served with broiled sliced bacon and a hot meat gravy poured over it, it is very good. Boiled, fried, baked with cheese, any way you have a mind to cook or serve Chinese Cabbage you will find it delicious. There won't be any tough outside leaves to it, for it's practically all heart, tender, crisp and juicy. It's very easily grown. Sow the seed in July in rows 15 inches apart and thin the same as Lettuce. We have tried all varieties of Chinese Cabbage and there are none that can equal this variety we offer. Pkg. 10c, ½ oz. 20c, oz. 40c, ¼ lb. \$1.25.

A Most Delicious Salad Is Made With Chinese Cabbage

Heart of Gold Melon

The Ideal Small Fruited Muskmelon for the Garden

This is the Melon de luxe for the home garden, its tender, sweet, juicy and melting flesh has a flavor unlike that of any other Muskmelon. It is not of large size, but just right for table use. Round, heavily netted, with deep orange flesh, these melons make a splendid appearance. The vines are very productive, strong growing and free from disease. Gardeners who have never had success with growing muskmelons will find this a heavy bearing variety even under unfavorable conditions. Don't leave muskmelon out of your garden list when you can grow Heart of Gold. One package of seed will produce enough fruit to plentifully supply the average size family. Seed pkg. 10c, oz. 25c.

Princess Juliana—A New Spinach

This new spinach is particularly good in the home garden. The leaves are thick, crumpled, dark green and are held by strong, thrifty growing plants, well up from the ground. This keeps them from being splattered by mud during heavy rains and always clean. A variety that can be cut over a long period as it is very slow to run to seed. Pkg. 10c, oz. 15c.

Ebenezer or Japanese Onion

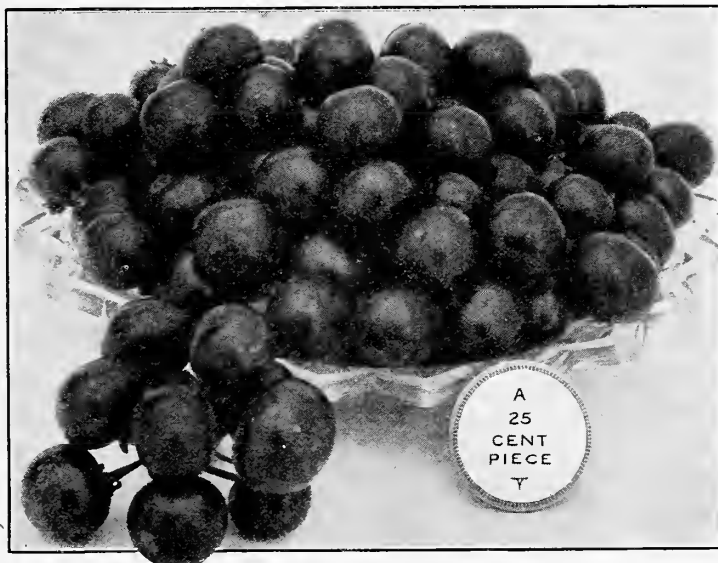

A remarkably mild onion, tender and of delicate flavor. People who have grown this variety prefer it to any other. For winter keeping this round, yellow skinned, white fleshed onion can't be equalled. We recommend it to you in every way. Pkg. 15c, oz. 75c.

Honey Ball Muskmelon

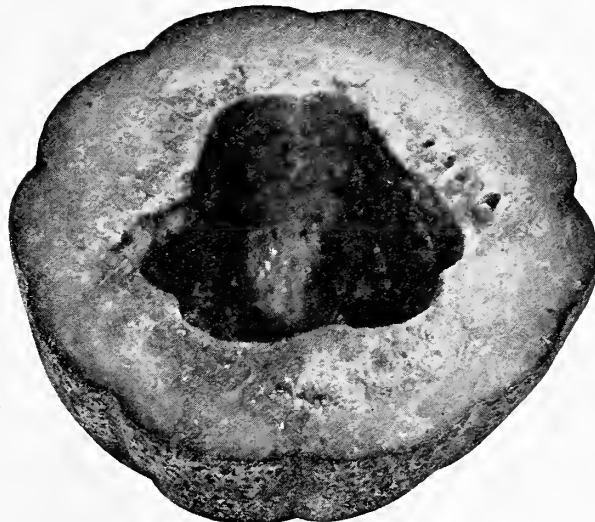

There is no sweeter or better flavored melon than this splendid variety which is a cross between a Cantaloupe and a Honey Dew Melon. The strong, thrifty vines bear quantities of ball-shaped, netted fruit, with thick green meat with the delicious flavor of the famous Honey Dew Melon. Start the seed early for this melon is rather late in maturing. Pkg. 10c, oz. 40c.

Vick's Scarlet Globe Radish

This is the best all round radish for your garden. Best in the coldframe, best in the open ground. The bulbs are always solid, crisp, pure white, mild flavored and tender. Sow some seed every ten days until July and you can have radishes on your table all season. Pkg. 10c, oz. 15c, ¼ lb. 35c.

Garden Huckleberries

Heart of Gold Muskmelon

The New Early Giant Pepper

Here is a great new pepper for your garden. The plants are very vigorous, growing 1½ to 2 ft. high and actually loaded down with giant fruits, thick fleshed, sweet and pleasant flavor. Pkg. 15c.

Table Queen—A New Squash

It is a real pleasure to us to be able to offer to you this year this splendid new home garden squash, Table Queen. To those who are fond at all of winter squash it will be a rare treat. In size it is about the same as a cocoonut and requires less than half an hour to bake or boil. Prepare it by cutting in half, putting in a lump of butter, covering with the other half and baking. Half a squash is ample for one person. An enormous yielder, a few hills will supply the ordinary family. Pkg. 10c, oz. 25c.

Garden Huckleberries Make Delicious Berry Pies

These Pie Berries grow big, strong plants that bear quantities of fruit the same season that you sow the seed. Some call them Sun Berries, others Wonder Berries, their botanical name is Solanum Nigrum. Down in Wayne County, N. Y., where we saw them first, they call them Seed Huckleberries, first because they grow and bear from seed the first year and Huckleberries for the reason that pies made from them rival the most delicious Huckleberry pies that you ever tasted. Customer friends of ours urged us to try making pies from them. We did so and are as enthusiastic over their merits as nearly every one is who ever tried them. These pie berries are not a freak; they are just a mighty good garden fruit. Package of 50 seeds, 15c; 2 packages for 25 cents.

Dr. Rittenhouse, of the American Journal of Clinical Medicine, says:

"Last winter I sent to you for some seed of your wonderful Pie Berries and the results have been so delightful that I must tell you about them. I have no garden, so sent the seed to my nephew, 500 miles from here. In September he sent me by parcel post one quart of the berries which, in spite of rough handling and being six days on the road, arrived in perfect condition showing their splendid shipping qualities. We made pies of them and were sorry the quart was not a bushel as the pies were all you claimed for them—delicious. To call one's attention to this fruit is to do him a favor. It is not only delicious, but wholesome."

You must plant good seeds to grow good flowers and vegetables. Putting poor seed in the ground is just a waste of time and money. Our reputation for sending out good seed is well known everywhere. You can depend on its quality every year.

ASPARAGUS

While nearly everyone is fond of asparagus and would like it fresh from their own garden many think it hard to grow and that it requires a lot of space and do not try it. This is not true for you can grow mighty good asparagus with but little trouble. If you sow the seed you can cut the third year, from roots the second year after planting. A bed of asparagus will yield for 20 years or more.

Put 5 in. of good rich soil on top of this and lay the plants in 2 ft. apart, spreading the roots and keeping the crown upright. Cover with soil to within 4 in. of the surface and as the plants grow cover gradually. The rows should be about 3 ft. apart.

GARDEN BEETS

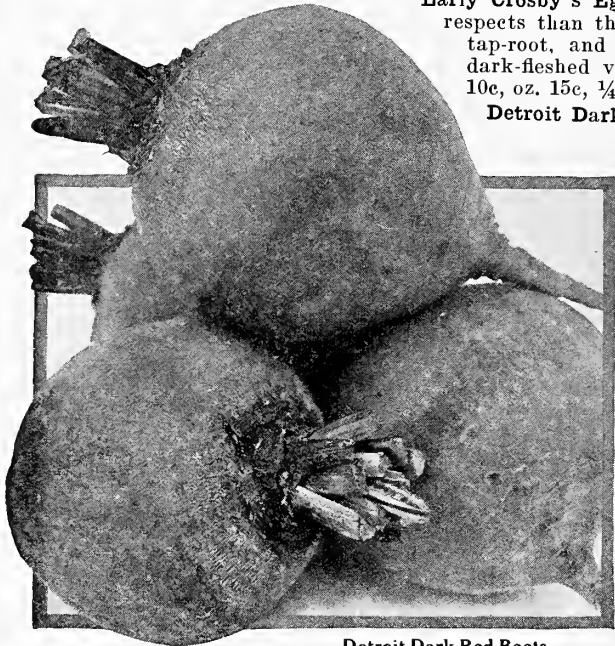

One package will sow 15 ft. of row, 1 oz. 50 ft., 5 to 6 lbs. to the acre

The best results are obtained on a deep, rich sandy loam. Sow seed 1 inch deep, in drills 16 inches apart, as early as possible. If wanted very early, sow Detroit Dark Red and Crosby's Egyptian in hotbeds and transplant to open ground. Thin to stand 3 or 4 inches apart. Cultivate cleanly and thoroughly. For succession, sow at intervals until middle of July.

Early Crosby's Egyptian. Our special strain of this popular variety is better in many respects than the old one. Globular in shape, perfectly smooth, has a short top, small tap-root, and both skin and flesh are dark in color. Much earlier than all other dark-fleshed varieties. The very best early Beet for home or market garden. Pkg. 10c, oz. 15c, ¼ lb. 40c, lb. \$1.40.

Detroit Dark Red. The most popular and best canning Beet grown. As a second-early variety, we recommend it for the home and market garden. Our special strain is more uniform in shape and color than the old Detroit Dark Red. The tops and tap-roots are small and the leaves dark green, shaded red. The Beets are round, smooth, and very dark red in skin and flesh. In tenderness and sweetness they are unsurpassed. Fine for canning. Pkg. 10c, oz. 15c, ¼ lb. 40c, lb. \$1.40.

Early Wonder. For those who want the very earliest Beet, this variety should be planted. The tops are medium short and the Beet is round with skin and flesh lighter than Detroit. Pkg. 10c, oz. 15c, ¼ lb. 40c, lb. \$1.40.

Detroit Dark Red Beets

BROCCOLI

A vegetable very similar to Cauliflower but less delicate in flavor. Hardy, thrives best in cool weather and should be hoed and watered frequently. Broccoli is used in northern climates where Cauliflower does not do well. Sow the seed inside or in coldframes in January or February and set out plants when ground is warm. Cultivate the same as Cauliflower.

White Cape. Large solid creamy-white heads of good flavor. Pkg. 10c, oz. 50c.

MANGELS AND SUGAR BEETS

There is no crop more valuable for feeding cattle and sheep than mangels and sugar beets. In these last few years it's hard to find a dairyman who does not feed them. 45 tons to the acre is the average yield, they are easily harvested, not a particle of waste to them, and may be stored in pits and root cellars with little trouble. Sow 8 lbs. to the acre in May or June in drills 2 ft. apart and thin to 10" in the row.

Golden Giant. Many dairymen claim this is the greatest yielder of them all. Giants in size, not as long as Long Red but larger round; grows two-thirds above ground, skin yellow, flesh white and solid. A fine kind for shallow soils. Oz. 10c, ¼ lb. 20c, lb. 65c, 10 lbs. \$6.00.

Golden Tankard. Oval shaped, yellow skin and flesh, smooth, grow half out of the ground. Splendid food value. Oz. 10c, ¼ lb. 20c, lb. 65c, 10 lbs. \$6.00.

Long Red. Long giant Mangels, light red, smooth, grow well out of the ground, splendid for feeding and keep well. Oz. 10c, ¼ lb. 20c, lb. 65c, 10 lbs. \$6.00.

Giant Double Sugar. Contains more sugar and is more valuable for feeding than any other kind. Very large, oval, grow half out of ground, enormous yielder, white with red tops. Oz. 10c, ¼ lb. 20c, lb. 65c, 10 lbs. \$6.00.

SWISS CHARD OR SPINACH BEET

One package will sow 25 ft., 1 oz. 100 ft.

Giant Lucullus. (See cut.) A vegetable of many fine qualities not well known in the home garden, but which should be more widely planted. Grown exclusively for the numerous, fleshy, tender leaves and leaf stalks, which, for use as greens, are superior to those of other Beets. Later in the season the wax-like leaf-stems are cooked like asparagus or are pickled. Seed planted early in the spring will produce plants from which cuttings may be made all summer, as you can cut right down to the ground, and new shoots will spring up and make a fast growth. Every garden should have a few rows of this desirable vegetable. Make sowings every 10 days and have greens all season long. Pkg. 10c, oz. 15c, ¼ lb. 35c, lb. \$1.00.

Large-Ribbed Silver Brazilian. Light colored leaves in great abundance. Mild flavor. Pkg. 10c, oz. 15c, ¼ lb. 35c, lb. \$1.00.

You May Not Know This

The word "late" as applied to vegetables does not mean that they should be planted late in the season. It means that it takes them longer to mature than the "early" kinds. Good gardeners sow "late" and "early" kinds as soon as possible in the spring and again about two weeks later. This gives them a succession of vegetables all summer. Then they sow the "early" kinds in mid and late summer. These mature quickly and supply the table with fresh vegetables in the early and late fall. It pays to keep your garden working all season.

Giant Lucullus Swiss Chard

Chinese or Celery Cabbage

Do not confuse our Chinese Cabbage with the ordinary kind offered for sale. As in other vegetables, there are many varieties of Chinese Cabbage, or Pe Tsai, as it is sometimes called. Some are loose-leaf growing, like Cos lettuce, others form heads like cabbage, head lettuce, celery, etc. To determine which variety was the best for both home garden and market, one of Irondequoit's leading gardeners made thorough tests of each kind. These showed one variety to be far superior to all others. Its long, oval shaped, eight or nine pound perfectly formed heads were solidly packed with cream white, tender, crisp and delicious leaves. Creamed like cauliflower, celery or ordinary cabbage it is delicious. For salads and cold-slaw it cannot be beaten. You should have some in your garden. Be sure and sow Paoting, not ordinary Chinese Cabbage, which is called Pe Tsai. Pkg. 10c, oz. 40c, ¼ lb. \$1.25, lb. \$4.00.

CHOICE CUCUMBERS

Cucumbers should be raised in every home-garden. They can be grown to perfection with ordinary care. Plant seed when danger from frost is over, an inch deep in hills, 4 to 6 feet apart each way, dropping 8 to 10 seeds in a hill. When second set of leaves have formed, thin to four plants to a hill. Cultivate thoroughly until runners make this impossible. If plants are attacked by beetles, spray with Pyrox or arsenate of lead. Always wash fruits thoroughly before eating when these sprays are used. If foliage is attacked underneath, spray with Black-Leaf 40.

One package will plant 15 hills; one ounce 50 hills; 2 to 3 lbs. an acre.

Deltus. This is the perfect Cucumber originated and perfected by Adelbert Titus of Irondequoit, N. Y., and for which we are sole distributors. The fruit is 10 to 12 inches long, uniform in diameter its entire length with very blunt ends and rich dark green in color. If you like cucumbers and want them on your table when they are at their best, fresh, crisp and juicy, plant a few hills of this perfect cucumber. We know you will find it all that we claim it is. When you have picked and eaten some Deltus write and tell us what you think of it. Pkg. 10c, oz. 40c, ¼ lb. \$1.00, lb. \$3.00.

HART & VICK'S LETTUCE

For extra-early plants, sow seed in February or March in hot-beds; transplant to open ground in April. Lettuce, to be at its best, should grow rapidly. Soil should be made as rich as possible by fertilizing and thorough preparation. For main garden crop, sow seed outdoors in a warm spot in the garden, as early in spring as possible, in rows 18 inches apart. The way to raise good heads of lettuce is to thin them out when they are an inch high so they will stand 8 inches apart in the row. Fresh lettuce can be had all season by sowing at intervals of two weeks. One package will sow 35 feet, an ounce about 200 feet.

GOOD GARDEN PEAS

Fresh, young, sweet Green Peas grown right in your own garden, cooked and served an hour or two after they have been picked, make one of our most delicious vegetables that you may have on your table for a long season by planting a proper selection of varieties that mature in succession. The very early, smooth peas can be sown while some frost is in the ground. They bear very early, but are not as sweet as the wrinkled kinds. Sow the wrinkled varieties when the ground is warm. Plant peas in trenches that are three or four inches deep and 2 feet apart, covering seed with an inch of soil. Tall varieties should be kept from trailing on the ground by supports. This is a little more trouble than in growing the dwarf kinds but you will get more peas from them. Pinch back the tips of the runners of the tall kinds; it makes a heavier crop.

HART & VICK'S RADISH

One package of seed will sow a 15 foot row, one ounce 60 feet

This is another vegetable that loses about half its flavor if you don't eat it within a very short time after it is taken from the ground. Radishes wilt, like flowers and other vegetables, and lose their fresh crispness and juicy delicate flavor. You can't know how really good radishes are if you haven't gone out in the garden in the early morning and pulled a few for your breakfast.

For forcing, sow in hotbed or under glass in rich, sandy loam. Scatter 50 to 100 seeds to the foot and cover with $\frac{1}{2}$ inch of soil sifted on. Sow in garden, as early as possible, in rows about 12 inches apart and thin to prevent crowding. A good dressing of nitrate of soda will greatly help their growth and make them tender and crisp. Successive sowings every week or 10 days will keep your table well supplied the entire season.

Vick's Early Scarlet Globe. Our Special Strain of this Radish for the home and market garden is very fine. The seed is selected from bulbs of the true Scarlet Globe type. It is a strain we can recommend to both market and home garden growers. Vick's Scarlet Globe is the best all-round Radish on the market, best for forcing; best in the garden. Tops are very small. Bulbs of our Special Strain are uniformly true globe-shaped, rich scarlet; flesh pure white, crisp, tender, juicy and mild. Pkg. 10c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

The flesh is pure white, tender, juicy and of very mild flavor. This is also a fine radish for forcing under glass, being ready for market before any of the other red kinds. Pkg. 10c, oz. 15c, $\frac{1}{4}$ lb. 35c.

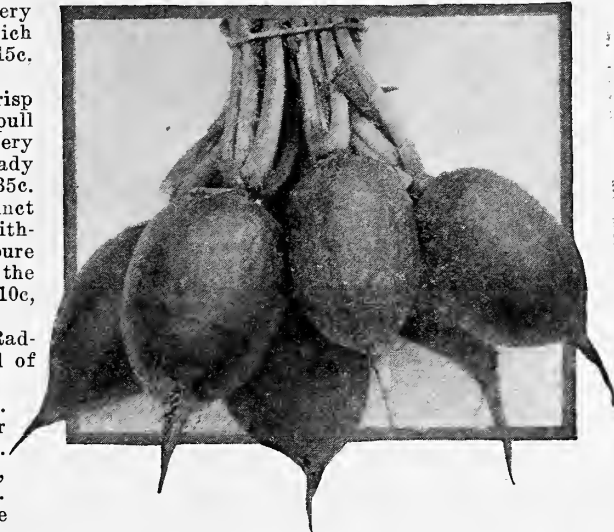

Sparkler. A quick growing variety of deep scarlet color with a distinct white tip that makes it very attractive. It holds its quality longer without becoming pithy than most early kinds. The flesh of this radish is pure white, crisp, tender and delicious. Not only an excellent kind for the Home Garden but a money maker for the commercial grower. Pkg. 10c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

These Radishes are not intended to be eaten as the spring sorts, but they should be sliced and salted down fifteen minutes before meal hour, when salt water is thrown off, and without further dressing are served, when they are as tender as any Radish could be wished for. Mary Pickford and the New Mary Pickford Sweet Pea

The New Sweet Pea—"Mary Pickford"

At last we can offer you a flower that, for its beauty and grace, is worthy of the name of America's Sweetheart, Mary Pickford. Just as Miss Pickford is the favorite of the lovers of the screen so we believe this new sweet pea named in her honor will become the favorite of lovers of beautiful flowers. Mary Pickford is one of the finest Orchid Flowering sweet peas ever introduced. A beautiful light and dainty cream-pink, with just the faintest suffusion of salmon. The flowers are perfectly formed, beautifully waved and generally come four to the stem. We urge you to try this new variety. You will be more than pleased with it. In originator's packets, 25c each.

Royal Bouquet Verbena

If you have ever grown Verbena yourself or have seen them growing in some friend's garden, you have thought, what a gorgeous bed these brilliantly colored flowers would make if they only grew on strong, upright plants instead of having their carpet-like creeping habit. The "Royal Bouquet" Verbena we are importing from Europe this year has this upright growing habit. It forms a plant 15 to 18 inches high and not more than 10 inches across and holds its giant, brightly colored blossoms perfectly erect. It is a great addition to bedding plants and will attract much attention in any garden. In originator's sealed package, 25c each.

Why Not Grow Dahlias from Seed?

W. D. Cramer of the Dept. of Biology, Ferris Institute, writes us as follows: "Why don't more people grow dahlias from seed? I have been doing it this summer and have had a very interesting experience and remarkable results from your Dahlia Seed. Some of the plants grew six feet high and had many blossoms measuring between 4 and 8½ inches in diameter. The colors have been wonderful, there being combinations I have never before seen in dahlias. I recommend this experiment to your customers."

"Exquisite"—A New Hollyhock

The flowers of this splendid new Hollyhock, which will, no doubt, create widespread interest, are very large, measuring 4 to 5 inches across, and possess the charming new feature that every petal, both around the circumference and in the center, is exquisitely curled and fringed. The mixture which we offer includes Rose, Light Rose, Carmine, Violet and Dark Purple. Pkg. 25c.

"Snow White"—A New Gypsophila

A serious drawback to the usefulness of the popular Double Perennial Gypsophila has hitherto been that it is not really a pure white. After a number of years of selection this strain is introduced whose flowers are absolutely pure white and produces a larger percentage of double flowers than the old Hardy Gypsophila. This is a valuable addition to your perennials. Sow seed this summer for next season's bloom. Pkg. 25c.

Asters from The Flower City

Through the activity and foresightedness of Mr. Charles H. Vick, of this Company, the strain of Asters known as "Vick's Branching" became well known to the floral world. The original Vick's Branching was introduced about 30 years ago, and at once sprang to the greatest popularity. Since that time many strains have been developed, but none that are better than the original. All of the seed which we offer, whether in the Branching class or in other classes, has been grown under our personal direction; it is absolutely fresh 1925 stock, free from stem rot and other diseases, strictly true to name and of the very highest quality. You get exactly the same high grade of seed in our ten and fifteen cent packages as we furnish the florist whose living depends on the quality of seed he gets from us.
